Since we built our slides entirely using PowerPoint you can customize every aspect of the templates to suit your need.

1. [edit background image powerpoint template](#)
2. [powerpoint template change background image](#)
3. [remove background image from powerpoint template](#)

Since We built our slides completely with PowerPoint you can customize every aspect of the templates to suit your needs.. Then we must select the File button under the area Insert Picture From as shown in the image below.. In this tutorial Im going to use a striped background found in the Striped Backgrounds category.. PowerPoint saves all your changes and even lets you revert back to the original non-transparent version.

edit background image powerpoint template

edit background image powerpoint template, powerpoint template background image, powerpoint template change background image, how to create a powerpoint template using a jpg image background, remove background image from powerpoint template, extract background image from powerpoint template, add background image to powerpoint template, create powerpoint template background image, powerpoint template background image size, background images economics powerpoint template, change background image in powerpoint template [Flex Type Bulgarian Phonetic](#)

PowerPoint saves all of your changes and also lets you fall back on the original non-transparent version.. In This tutorial Ill use a striped background found in the striped Backgrounds category.. Then we need to insert the date button below the range of image from as shown in the below screenshot.. However in Word 2010 at least the mailings tab on the Ribbon has an Edit Recipients List function that allows you to choose which recipients get included and even to edit the source file by addingdeleting records.. However at least in Word 2010 the Mailing tab on the Ribbon has a list of requests to edit recipients that allow you to choose which recipients to include and even edit the source file by selecting the ADD entries.
